

Problem

Solution

Expertise is needed at remote locations but experts cannot travel

Send SmartEyes kit to remote locations and let experts solve problems without traveling

Enabling Maximum Awareness to Remote Experts

Smartglasses

See what the user sees and provide instructions

Streaming cameras

High-quality video feeds (with slow motion and recording possibility) from selected locations

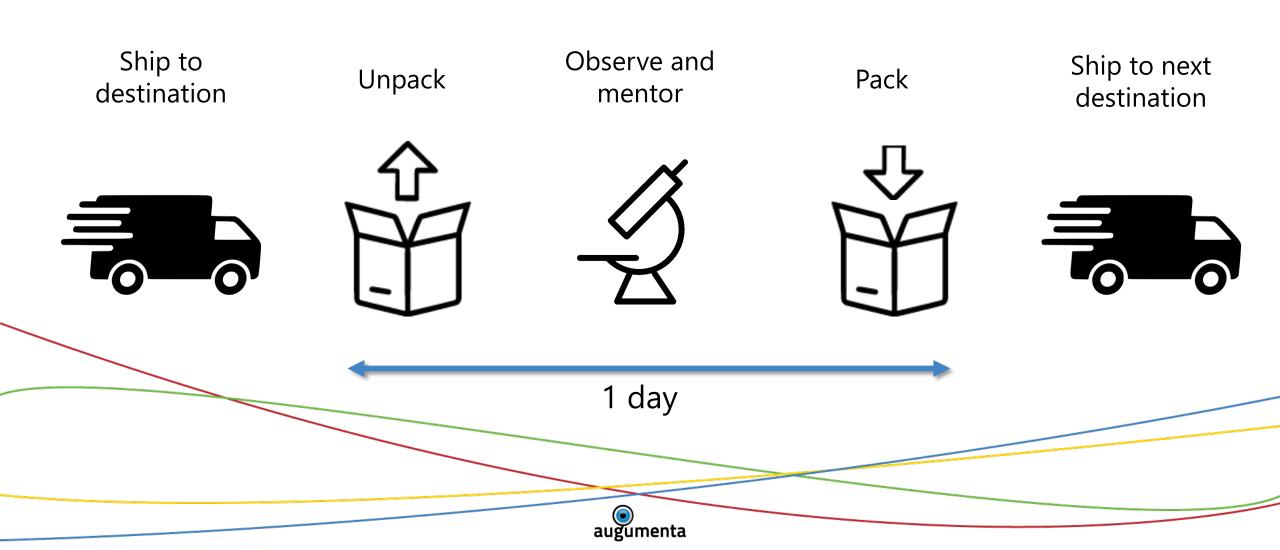

Wireless sensors

Understand the environmental variables not visible in video feeds

Designed for Efficiency and Ease-of-Use

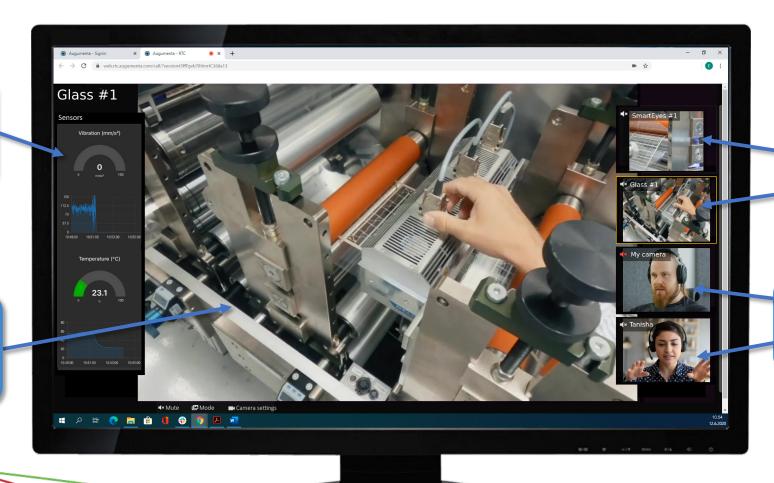

How Remote Experts See It

Realtime data from wireless sensors

Selected video feed in fullscreen view

Thumbnails of live video feeds from the destination

Experts in the call

A scalable solution

Compact

1080p30fps video WLAN/RJ45 network Dustproof

Standard

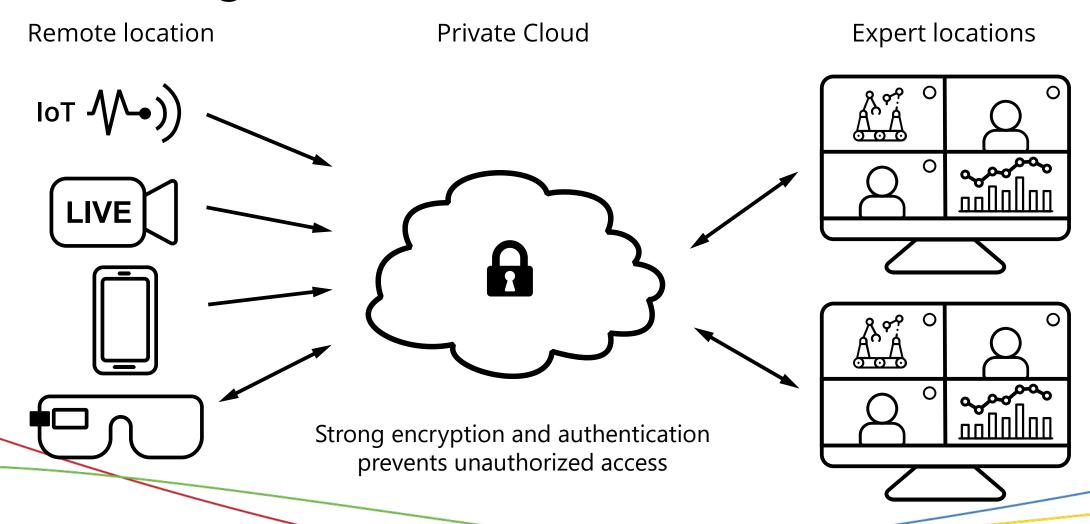

1080p30fps video
Short-range sensors
4G in selected countries
Dust and waterproof

Slow-motion video
HQ streaming
Global 4G/5G
Long-range sensors
Extreme weather

Augumenta End-to-End Architecture

Key Features

- Easy and fast to take in use; just unbox and turn it on
- See what the workers see while giving instructions to them
- Extra HQ eyes on the field; see more than a human eye could
- IoT sensors for sensing what you can't see
- Multiple experts in a session
- Independent of destination IT systems; no integration needed

SmartEyes Value-Add

- 1. No traveling; people stay safe, less money spent, smaller CO₂ footprint
- 2. Maximize experts' time utilization
- 3. Better visibility into the target being observed
- 4. Multiple experts involved leads to faster problem solving
- 5. Establish yourself as a leader in post-COVID-19 world
